(54) Title: HYPERBARIC THERAPY CAPSULE

(57) **Abstract:** A hyperbaric capsule (10) has a base (12) forming a seat (14) that can be enclosed by an elongate oval canopy (16) having a large transparent window (18) formed therein. The bottom of the front of the canopy (16) is pivotally attached to the front of the base (12) by a hinge assembly (22) and can be locked in the closed position on the base by a plurality of latches (50a - 50d) that are conjointly operated by an external lever (54) and an internal lever (56, not shown in Figure 1). The weight of the canopy upon opening is borne by a pair of side gas or spring struts (24).
